02	2026-03	Security Scanner App Version 4.6.0

2 Important information

2.1 Product information

For the latest information on our products, go to ➔ <https://www.boschrexroth.com>.

For current security advisories, please refer to ➔ <https://psirt.bosch.com/security-advisories/>

3 Version 4.6.0

3.1 New functions

3.1.1 Feature 1163043: Schedules and web-based view and editability of scan results

Description

The following new functionalities are supported:

Schedules:

- Scan jobs can be scheduled for defined points in time at specific intervals, for example:
 - Once
 - Weekly
 - Every first Tuesday of the month
- Definition of a maximum permitted execution time for a schedule. Two reactions are possible in case of an execution timeout:
 - Display of a warning and logging in the logbook
 - Abort of the scan jobs of the schedule and logging in the logbook
- Several scan jobs can be executed sequentially per schedule

Web view:

- Viewing and (partial) editing of scan results via the web view
- Export of scan results as PDF, HTML and XML

Report templates:

- Use of individual report templates that extend the standard report with additional columns

Miscellaneous:

- Configurability of the timeout parameters for scan jobs
- Ability to run host discovery scans without defining the expected hosts

3.2 Resolved defects and modifications

3.2.1 Bug 1091668: Report shows "Passed" although no policy and no expected ports were defined

Description

As a result of a port scan, "Total Result: Passed" is displayed if neither a policy nor the expected ports were defined.

Troubleshooting

Scans without specifying a policy and/or the expected ports will no longer return a result.

3.2.2 Bug 1124161: A user with the authorization to manage and start scan jobs cannot delete scan results

Description

It is not possible to delete scan results despite the authorization to manage scan jobs.

Troubleshooting

The authorization to manage scan jobs now also enables the deletion of scan results.

3.2.3 Bug 1163801: Changing a recurring schedule to "One-time" does not delete obsolete entries

Description

If an existing recurring schedule is changed to a one-time execution, the now obsolete entries are not removed. The schedule is executed correctly.

Troubleshooting

The obsolete entries are removed.

3.2.4 Bug 1163897: Sporadic display of a missing license

Description

In isolated cases, it could occur that a license was not available when a website was opened.

4 Version 4.4.1

4.1 New functions

4.1.1 Feature 1131694: Improving the progress bar and updating internal components

Description

The progress display has been improved and now facilitates assessing the scanning progress. The internal components have been updated.

4.2 Resolved defects and modifications

4.2.1 Bug 1091657: Overall port scan result is incorrectly marked as "PASSED"

Description

The overall result of a port scan is incorrectly marked as "PASSED", although individual port scans have failed.

Bug fixing

The overall result is "FAILED" as soon as at least one individual scan has failed.

5 Service and support

Our worldwide service network provides an optimized and efficient support. Our experts provide you with advice and assistance. You can contact us **24/7**.

Service Germany

Our technology-oriented Competence Center in Lohr, Germany, is responsible for all your service-related queries for electric drive and controls.

Contact the **Service Hotline** and **Service Helpdesk** under:

Phone: **+49 9352 40 5060**

Fax: **+49 9352 18 4941**

Email: [↗ service.svc@boschrexroth.de](mailto:service.svc@boschrexroth.de)

Internet: [↗ http://www.boschrexroth.com](http://www.boschrexroth.com)

Additional information on service, repair (e.g. delivery addresses) and training can be found on our internet sites.

Service worldwide

Outside Germany, please contact your local service office first. For hotline numbers, refer to the sales office addresses on the internet.

Preparing information

To be able to help you more quickly and efficiently, please have the following information ready:

- Detailed description of malfunction and circumstances
- Type plate specifications of the affected products, in particular type codes and serial numbers
- Your contact data (phone and fax number as well as your e-mail address)
